

Job Description – Remote RoR Engineer

ABOUT THE PROJECT AND THE TEAM:

Our client is the largest crowd-sourced digital content library in the world that includes photos, illustrations, vectors, 3D content, video, and music.

We are looking for top technologists to join one of our teams (acquired company), which is the leading provider of 3D models designed for films, games, commercials, architecture and more. You will help drive the future growth of our 3D content website. The team's mission is to provide mentorship and peer reviews while gaining understanding of our codebase and business.

You will be working with highly-motivated and talented engineers on exciting and complex problems for the industry-leading 3D content website, with quality, performance, and scale in mind at every step of the way.

Responsibilities:

- Develop new features on our groundbreaking asset management system using Ruby on Rails;
- Using the latest technologies (RoR, ReactJs, StimulusJS, Hotwire, etc.);
- Optimize our artist facing SPA to add content and metadata to products in the world's largest 3D model marketplace;
- Integrate our artist workflow management system into the rest of our production ecosystem;
- Develop internal tools to streamline curation of the content catalogs for marketing and syndication.

Requirements:

- Knowledge and experience in Ruby on Rails;
- Some (or good) experience in front-end technologies like React , Redux;
- Experience with PostgreSQL;
- Experience with JS/HTML/CSS;
- Source Control: Git (Github);
- Progress Management: JIRA, Asana;
- Self-motivated and proactive; ability to work independently and collaboratively as part of a team, and take creative feedback constructively;
- JSON:API and GraphQL;
- ES6 / Babel;
- Knowledge or experience with MySQL, Elasticsearch, MongoDB or willing to work with;
- Automated testing and unit testing;
- English is a must (international team).

Offer/Benefits:

- Annual bonuses, Additional grants, Private Medical Insurance, Meal Vouchers, Fitness, Mindfulness, Tuition Reimbursement, Financial Wellbeing and Employee Assistance Programme, fully remote role, long term employment contract
