

## Full Stack Developer

---

We are a team of Full Stack developers (NodeJS + ReactJS) with the primary focus on developing a robust and easy to maintain application.

Each of us works on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

### Responsibilities

Developing new user-facing features using React.js and/ and complex back-end features using NodeJS

Building reusable components and front-end/ back-end libraries for future use

Optimizing components for maximum performance across a vast array of web-capable devices and browsers

### Skills

Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model

Strong proficiency in NodeJS and/or ReactJS

Thorough understanding of React.js, its core principles and related tools (ie, React Router)

Familiarity with newer specifications of EcmaScript

Experience with TypeScript is a plus

Knowledge of isomorphic React is a plus

Experience with MobX or other state management libraries (together with React) is a plus

Familiarity with RESTful APIs

Familiarity with modern front-end build pipelines and tools

Experience with common front-end development tools such as Babel, Webpack, NPM, etc.

Ability to understand business requirements and translate them into technical requirements

A knack for benchmarking and optimization

Familiarity with Git or other code versioning tools

Experience with React Native is a plus
