

## Job Description - Data Analyst

---

### ABOUT THE PROJECT AND THE TEAM

We are the creator of an Omni-channel retailing system for both in-store and online businesses. We are seeking a Data Analyst to join our product team.

Our team is fully remote - from Dublin and Romania.

The ideal candidate will have excellent SQL and Business Intelligence skills with a focus on quality, performance, extensibility and maintainability of reporting tools. This is an opportunity to learn from more experienced, talented technologists as well as gain experience in taking an idea from an initial concept to releasing a new product to market.

### WHAT IS EXPECTED OF YOU:

- Your Job will involve elaborating requirements together with stakeholders;
- You will be working on latest technologies;
- Fine eye for details and a deep understanding of the popular data analysis tools and databases;
- Helping develop reports and dashboards;
- Develop and build our modular, scalable, high-performance, enterprise class reporting system;
- Managing and designing the reporting environment, including data sources, security, and metadata;
  - Troubleshooting the reporting database environment and reports;
- Providing technical expertise in data storage structures, data mining, and data cleansing.

### WHAT YOU NEED:

- 3+ years of full-time experience as a Data Analyst;
- Proven working experience in data analysis;
- Top-notch teamwork and communication skills;
- Ability to manage your workload with minimal supervision;
- Ability to analyse existing tools and databases and provide software solution recommendations;
- Demonstrated experience in handling large data sets and relational databases;
- Strong mathematical skills to help collect, measure, organize and analyse data;
- Knowledge of how to create and apply the most accurate algorithms to datasets in order to find solutions;
  - Knowledge of BI software to design, share, and distribute interactive dashboards and reports (we are using WYN Reports as a BI tool).
