

## Job Description – Mobile Android Engineer

---

### ABOUT THE PROJECT AND THE TEAM:

We are developing our own product – an Omni-channel retailing system for both in-store and online businesses.

Our team is based in Dublin and Romania (mainly Craiova) and we all work remotely.

We are looking for an **Android Engineer** to join our team.

### WHAT IS EXPECTED OF YOU:

- You will be working on latest technologies;
- Your Job will involve elaborating requirements together with stakeholders;
- Develop and build our modular, scalable, high-performance, enterprise class, digital software platform and applications;
- Work in an agile development environment to build modern web and cloud applications.

### WHAT YOU NEED:

- 2+ years of full-time experience in Software Development, Design and Architecture;
- Knowledge of Android SDK, different versions of Android, and how to deal with different screen sizes;
- Familiarity with RESTful APIs to connect Android applications to back-end services;
- Knowledge of Android UI design principles, patterns, and best practices;
- Proficiency in Java, Kotlin;
- Top-notch teamwork and communication skills;
- Degree qualification in IT or an Engineering discipline;
- Ability to manage your workload with minimal supervision.
