

Job Description – .NET Developer

ABOUT THE PROJECT AND THE TEAM:

We are designing, creating, maintaining, and delivering software for our various international clients. We first understand our retail clients business needs and deliver solutions within the software to optimize the business's goals.

We have delivered and created our own solutions implementing them to other clients, together with maintaining, adjusting, and upgrading the current applications, including to alter or add feature to current software and optimize performance.

We do performance of quality checks and tests for all applications, constantly evaluating the quality of the work. All while keeping records and keep proper documentation up to date.

On occasion we travel abroad to the client's location.

We are looking for self-motivated, ambitious, and creative developers to be part of this team, doing all (or some of) the above.

WHAT IS EXPECTED OF YOU:

- **Developing - Designing forecasting algorithms & AI modules**, delivering predictions based on past and present data for our retail planning solutions;
- **Coding** - Producing efficient code with the objective to improve the functionality of the code also to reduce the time and space complexity of the algorithms. While the elegant code also displays the essence of the problem its solving based on the requirements;
- **Collaborating** – working with management, departments and customers to identify end-user requirements and specifications;
- **Maintenance** - Troubleshooting, testing, debugging, maintaining and improving existing software while compiling and assessing user feedback to improve software performance;
- **Documentation** - Creating and maintaining documentation on all work for future reference;
- **Integration** – with your CI/CD experience (continuous integration/ continuous delivery) – to deliver creation and maintenance of deployment scripts.

WHAT YOU NEED:

- Demonstrable experience as a software developer;
- A love for algorithms;
- +3 years backend (C# .Net Core), +3 years frontend (either Web or Desktop), +3 years SQL
- Nice to have: React/ TypeScript, CI/CD experience, Cloud platforms like AWS & Azure
- Exceptional communication skills both written and verbal in English
