Jobs & Consulting Services

Java Developer

About the client and project

We are a credit insurer operating in more than 100 countries, offering companies solutions to protect them against the risk of financial default of their clients, both in their domestic and export market. We also offer debt collection services, factoring and business information and bonds.

We established our first offices in Bucharest in 1996. Since then, we have contributed to the operation and development of companies, both locally and internationally and had an informative and educational role in the business environment through publications and recurrent economic studies.

21 years later, in 2017 we are starting in Bucharest a new Development Center with a focus on becoming the most agile global trade credit partner in the industry.

Our IT products are developed by international teams, following the best practices and being certified ISO 9001.

We are looking for a **Full Stack Software Developer - Java EE** to build high-quality, mission-critical, innovative and fully performing software that complies with the coding standards and technical design and specifications.
